

TECNADIS GWR

Innovative rain repellent product
designed for vehicle windscreens

FORGET ABOUT RAIN!

TECNADIS GWR is a novel rain - repellent specifically designed for vehicle windscreens. Thanks to its water repellent effect, raindrops barely touch the surfaces and roll easily until disappearing from the windshield.

Rain -repellent : reduces the use of wipers.

The result is an improved both day and night visibility when driving with almost no need of using wipers.

KNOW ABOUT “TECNADIS GWR”

It repels rain water increasing safety when driving in the most adverse weather conditions.

It avoids windscreen freezing.

Cleaning insects, dust or dirt becomes an easier task.

Easy to use, so simple as cleaning, apply and dry.

Durability up to 12 months/20.000Km.

The best quality-cost rate in the market (10-15 ml is enough to treat one car windscreen).

WHY “TECNADIS GWR”?

Long durability: its abrasion resistance is five times higher than Rain X, similar to Crystal Dry applying only half product of TECNADIS GWR and similar to Aquapel but at a more competitive price.

It does not release Hydrochloric Acid, which allows its application in any environment and indoor place, unlike most of the products in the market.

It is applicable in just 5 minutes.

Only 10-15ml per car windscreen.

100% compatible with the materials adjacent to the windscreen.

HOW TO USE IT

1.- CLEAN

Thoroughly clean the glass and dry it.

2.- APPLY

The liquid is applied directly on the surface with the spray or with a paper cloth or microfiber cloth previously wet with TECNADIS GWR.

3.- DRY

Immediately after application, polish the glass with a cloth or dry paper to eliminate possible product excesses until total distribution and transparency is achieved. It is not necessary to leave a time of drying/curing.
